

Measuring Travel Time Reliability

Vince Pearce
FHWA

Why Focus on Travel Time Reliability?

- Multiple audiences
- Travelers can respond effectively
- Works across modes
- Works at multiple levels
- Regardless of trip length

Our Audiences

- The measure needs to be meaningful to:
 - The motorist (commuter, parent, retiree, etc.)
 - Freight carriers
 - Transit operators
 - Agency operations staff
 - Agency management
 - Elected/appointed decision-makers
 - Federal, state, and local
 - Planners

Why Do People Care About Reliability?

- Commuters
 - Getting to work/appointments on time
 - Day care fees!
- Truckers
 - “Just in time” delivery
- Transit
 - On time performance = customer satisfaction
- Business
 - Reducing wasted time
 - Predictable results

Why Does the Profession Care?

- What we can't do
- Some things we can do
- We can impact reliability!
- We can demonstrate performance!

The Challenges

- Not a traditional focus
- Not a traditional measure
- No commonly accepted measure
- Needed: a lot of data
- Data quality and completeness
- Little archiving
- Reliability varies

How is Travel Time Reliability Measured?

- Focus
 - “How often will I arrive within an allowable window?”
 - “How much time do I need to allow in order to arrive within a specified window at least X% of the time?”
- In relation to what?
- The range:
 - Timespan
 - Percentage

Measure on Which We Focused: Buffer Index

- Definition
- Source
- Interpretation
- Why have an index?

So What Do I Do With It?

- As a motorist, business, or media purveyor
- A possible broadcast

So What Do I Do With It?

- As an agency
- As an elected/appointed official

What We Did

- Ten freeway management centers
- Process the data
- Target measures
- Analyze the results
- Caveats

Reliability Throughout the Year

Buffer Index in Detroit by Day of Year

— Buffer Index

Buffer Index in Phoenix by Day of Year

— Buffer Index

Reliability by Time of Day

Buffer Index in San Antonio

— Buffer Index

Measuring Travel Time Reliability

Buffer Index in Los Angeles by Time of Day

— Buffer Index

Reliability by Day of Week

Buffer Index in Houston by Day of the Week (24-hr averages)

Buffer Index in Hampton Roads by Day of the Week (24-hr averages)

Reliability by Major Route

Buffer Index in Detroit by Directional Sections

Further Steps

- Second year of data for trends
- Analyze more locations
- Graphic illustrations
- Provide guidance
- Build support
- Increase data archival
